Chernushevich V.A. Folk game as an environmental preventive resource in the activity of a legal psychologist**Annotation.**

The principal possibilities of the folk game as a special model of the social environment are considered. The game provides conditions for the prevention of deviant behavior. Deviant behavior is interpreted as a violation of the rules of human relations in a certain time and place. The main reason for the violation of the rules is the absence of the concept of MUST in children and adolescents, the lack of experience in experiencing a community that is born of the free adoption of the rules of relationships.

Key words: folk game, prevention, deviant behavior, the concept of due and community.
