Development and initial approbation of the modified version of the questionnaire «facilitator – mediator –moderator»

Abstract.

The article describes a modified version of the questionnaire «Facilitator-mediator-moderator». The positive role of the tested methodology in the activity of the organization is shown, the authors also separately described the functions and role of the facilitator, mediator and moderator of the activity. All scales of the questionnaire have a high level of reliability-consistency, they were not revealed clearly uninformative or inefficient for the purpose of tasks. At the same time, the statistical data show that it is expedient to reformulate some statements to further improve the tool, eliminate the side meanings of the paragraph.

Keywords: questionnaire, facilitation technology, mediator, moderator, personnel management.

Bychkov V.M., Kalashnikov K.P., Bychkov M.V.

Vassilieva K.V.

Management of remote education of children with disabilities in the Moscow region

Abstract.

The author analyzes the organizational and legal aspects of the education management system for children with disabilities in the Moscow region as one of the most populated constituent entities of the Russian Federation. The strengths and weaknesses of the system of management of distant preschool and general secondary (school) education for children with special needs in the Moscow Region are revealed. The proposals on possible directions of improving the distant education management system for children with disabilities in the Moscow Region are formulated.

Keywords: adaptation, children, kindergarten, defectology, disabled people, distant learning, inclusive education, boarding school, education, special needs, tutoring, school

Doroshenko O.M.

Child abuse as a social problem

Abstract.

In Russian science and practice, a large-scale source and documentary Fund has been created and operates in the direction of child abuse and its prevention from both Soviet and modern, including international, positions. The implementation of modern law contributes to the continuous replenishment of this Fund, filling it with modern scientific and practical research, and therefore requires a detailed approach to the study of the materials contained therein.

Keywords: child, parent, teacher, internal Affairs bodies, law enforcement agencies, cruelty, actions, prevention.

Kuzhevskaya E.B., Druzhinina V.N.

A new approach to stress resistance of police officers and image of profession
(foreign experience)

Abstract.

The scientific article considers a new approach to the issues of stress resistance of law enforcement officers. The authors cite foreign experience in the study of stress factors in police activities. The article provides a description, results and conclusions of a foreign experiment that identifies potential stress factors in the activities of a policeman, identifies possible prerequisites for a stressful state, and thus outlines ways not only to overcome stress, but also to prevent it. According to the authors, the above statistical analysis may be useful in resolving the issues of psychology of police activities in Russia.

Keywords: stress resistance, police activities, law enforcement agencies, stress, stressful factor, stress prevention, a police officer, extreme conditions, statistical analysis.

Lyamzin M.A., Rodin V.F.

Formation of creative thinking in students in higher education

Abstract.

The article substantiates the relevance of the problem of development of productive (creative) thinking of students of higher school (students, cadets, graduate students). We propose a method for its solution at the expense of methodically competent application of innovative teachers (active and interactive) teaching methods and related organizational forms, which have implemented the requirements of the principle problems of teaching, discussion and independent study students.

Keywords: creative thinking, higher school, competence approach, professional activity, teaching methods, organizational forms.

Frolova T.N., Shashurina G.V.

Keywords: methodological culture, scientific research, humanization of science, integration of Sciences, scientific knowledge.

Khromov V.A., Kosyakin V.N., Yurtaev O.N.

Strength training for endurance development in professional physical training: from theory to practice

Abstract.

The article deals with increasing endurance through strength training of different directions from theory to practice.

Keywords: physical training, endurance, strength training.

Andreyeva G.B., Nikitina O.A.

Features of patriotic education of students in a multinational student team: the experience of the Institute of the Academy of the Federal Penitentiary Service of Russia

Abstract.

The role of patriotic education of youth is being rethought currently. Incitement to ethnic discord and international conflicts contribute to the separation not only of nations, but also of citizens of one country. The article presents the experience of the Institute of the Academy of the Federal Penal Service of the Russian Federation in organization of patriotic education of students in the conditions of a multinational student collective.

Keywords: Patriotic education, intercultural communication, multinational team, students, project.

Zautorova E.V.

Correction of convicts by means of theatrical pedagogy

Abstract.

Modern pedagogy in search of effective means of education is increasingly focused on the use of art in the pedagogical process. The article reveals the pedagogical potential of theatrical art and its role in the process of correction of convicts. The positive experience of introducing convicts to the dramatic art is also presented. Theater heals a person from the inside, placing in front of him all sorts of situations in life, directing him to solve important life issues and problems. Theatrical pedagogy in correctional institutions is aimed at correcting offenders, their moral and aesthetic development in isolation.

Keywords: prisoners of places of deprivation of liberty, the process of correcting, performing arts, theatre pedagogy.

Kulakova S.V.

The study of self-destructive behavior of the personnel of the penal system of the Russian Federation

Abstract.

The article is devoted to the analysis of the causes and risk factors for the development of self-destructive behavior in employees of the criminal Executive system of the Russian Federation. The main scientific developments on the prevention of deviant behavior in the field of autoaggressive behavior are summarized. Specific manifestations of autoaggressive behavior of law enforcement officers are described. A generalized portrait of an employee who committed suicide is presented. Suicidogenic risk factors specific for penitentiary activity and the main ways of prevention of this type of deviant behavior are defined.

Keywords: autodestructive behavior; deviant behavior, suicide; employees; criminal Executive system; prevention; psychologists.

Metlin D.G.

Actual questions of legal regulation of maintenance of socially useful communications of the condemned serving sentence in the form of imprisonment

Abstract.

Socially useful connections of convicts serving sentences in the form of imprisonment are an important factor that stimulates their correction. Maintenance of social relations of convicts promotes their re-socialization. The work on establishing and strengthening socially useful links of prisoners sentenced to deprivation of liberty is becoming the leading one in the process of improving the activities of penitentiary institutions.

Keywords: imprisonment, convicted, correction, educational work, socially useful connections, resocialization.

Panova O.B.

The study of the individual measure of remorse as a means of predicting the behavior of the convicted person

Abstract.

The article deals with the issues of forecasting the behavior of persons sentenced to imprisonment. Giving the substantiation of the urgency of the problem, the author refers to the content of strategic directions of penal policy, analyzes the scientific literature of recent years. The study of information sources allows us to state that the attitude to forecasting as a global task to a certain extent makes it difficult to formulate a clear forecast. As a means to implement private prognostic tasks in mass practice, the method «Study of individual measures of remorse of convicts» is proposed. This technique allows us to correlate the measure of awareness of the

convict of the negative consequences of the crime with the direction of his behavioral installation from the pedagogical standpoint.

Keywords: forecasting, diagnostic methods, projective technique, behavioral attitude, remorse of the convicted person, the principle of actualization of remorse.

Potemkin P.V.

On the question of psychoprophylaxis of social stresses of employees of the penal executive system

Abstract.

Discusses the stressful factors in the work of the penal system. Ways of forming protective mechanisms in the daily activities of the penal system employees, their impact on the effective performance of official tasks.

Rogovenko Ya.S., Kreneva Ju.A.

The psychological features of personality male convicts recognized as malicious violators of the established order of serving of punishment

Abstract.

Presents the psychological characteristics of male convicts recognized as malicious violators of the established order of serving the sentence. The article is based on empirical material obtained in the course of psychodiagnostic studies.

Keywords: offenders, prison, penal system, psychological characteristics of convicts, correctional institution, the order of serving the sentence.

Svobodniy F.K.

Legal consciousness of young criminals

Abstract.

Deals with the results of the study of the features of the legal consciousness of young offenders serving a sentence of imprisonment. Conclusions are drawn that the legal consciousness of this category of citizens is characterized by a low level of awareness on legal issues, indifference in the emotional assessment of the existing legislation, disbelief in the effectiveness of the mechanisms of legal regulation of public life.

Keywords: legal consciousness, legal awareness, attitude to law, youth criminals.

Sochivko D.V.

Some psychological problems of personal growth of cursors in the process of training in educational organizations of the FSIN of Russia

Abstract.

Discussed the issues of personal growth of students in the process of training in educational organizations of the FSIN of Russia. By the method of slices it is shown that a number of professionally relevant personal qualities regarding further service are reduced during the training process from the second to the fourth courses. Interpretation of the obtained results allows us to make some suggestions for improving the work of psychological services of institutions.

Keywords: personality psychodynamics, self-attitude, psychological defenses, structure of interpersonal communication, existential fullness of personality.

Sukhov A.N.

Tikhomirov S.N., Mishkina V.A.

Features of socio-cultural adaptation migrant children

Abstract.

The main provisions of the sociocultural adaptation of migrant children are presented. The modern research of Russian scientists on the studied problems is analyzed. The authors identify the components and criteria for assessing the sociocultural adaptation of a migrant child in an educational institution.

Keywords: sociocultural adaptation, migrant children, educational institutions, pedagogical environment.

Cheremisova I.V.

Psychological and pedagogical aspects of the problems of legal and penitentiary psychology

Abstract.

The article presents a scientific review of modern dissertation research on legal and penitentiary psychology from the standpoint of psychological and pedagogical science. The analysis of researches allowed to reveal the most acute and significant problems of preparation of cadets for professional activity in FPS. Special attention was drawn to the work on improving the training of psychologists to work in the FPS, optimizing the professional development of future specialists, their adaptation to professional activity. These studies are of undoubted interest for the development of training courses of specialized universities and in the system of professional development of employees. The conclusions of the researchers allow us to identify possible ways to overcome the difficulties and negative manifestations of the process of professionalization of future specialists. Directions of research contribute to the definition of prospects for the development of psychological and pedagogical knowledge in the space of educational institutions of the Federal penitentiary service of Russia.

Keywords: pedagogical psychology; dissertation research; cadets of educational institutions of the Federal penitentiary service of Russia; penitentiary psychology, personality of the cadet.

Shinyaev K.A.

Influence of psychological stability of the person condemned in opposition to persons of a negative orientation

Abstract.

This article presents a theoretical analysis of the scientific literature on the problem of psychological stability of the convicted person and adaptation to the new conditions of serving the sentence in opposition to persons of negative orientation. The results of the correction program on the organization of psychological support for convicts of the correctional institution are displayed.

Keywords: psychological stability, adaptation, components of psychological stability of the individual, convicts of negative orientation, correctional colony.

Schurkova N.E.

Pedagogical training in the educational process of prison institution

Abstract.

The article reveals the concept of «pedagogical training», characterized by its three main types.

Keywords: pedagogical training; behavior; educational process; penal system.

Eriashvili N.D.

About admissibility of innovations in activity of criminal Executive system of the Russian Federation

Abstract.

On the basis of the analysis of legal literature and legislation on the admissibility of innovations in the activities of the criminal Executive system of the Russian Federation, several judgments are made: the legal basis for the use of innovations in the activity of criminal-Executive system, is the Federal law «On education in Russian Federation» dated 21 December 2012; use of innovations in the penal system means involving employees in the process of digitalization of their official activities; the use of innovations in the penal system means the application of innovative technical tools, while ensuring the detention of convicts in penal institutions.

Keywords: The Russian Federation, legislation, Constitution, penal laws, the Federal law of the Russian Federation, Criminally-the Executive code of the Russian Federation, Federal law «On education in the Russian Federation» of 21 December 2012, criminally-Executive system, innovation.
